CASE STUDY

Free, Real-Time Worldwide News Aggregation

Built by RYC | atlas-report.vercel.app

March 2026

The Atlas Report

Worldwide news, one report at a time

What is it?

The Atlas Report is a free, open-source global news aggregation platform that displays trending news from 28+ countries worldwide. It pulls real-time articles from trusted sources like BBC, Al Jazeera, NPR, DW, and France24, ranking them by relevance and recency.

Key Features

28+ Countries	Real-time feeds from trusted international sources
17 Languages	On-demand translation for titles and full articles
Interactive Globe	D3.js-powered 3D globe to explore news by region
Smart Caching	Stale-while-revalidate pattern for fast article loading
Article Ranking	Trending algorithm surfaces the most relevant stories
Dark / Light Mode	Automatic theme detection with manual toggle
Bookmarks	Save articles for later reading
No Ads, No Paywall	Completely free and open access

Tech Stack

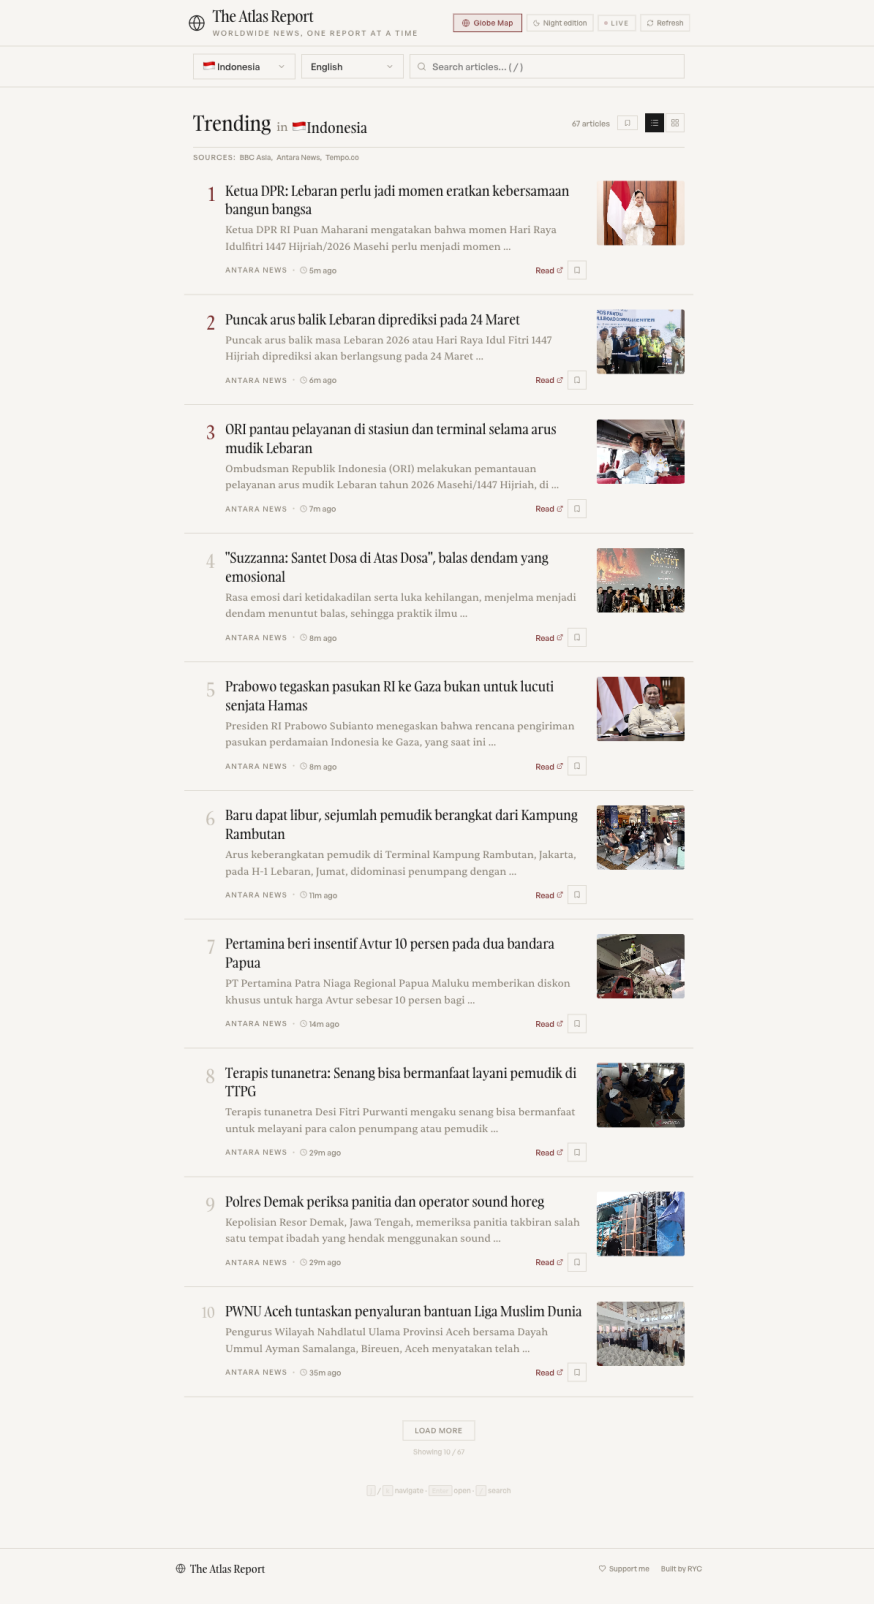
React 19 | Vite | D3.js | React Router
Mozilla Readability | DOMPurify | Google Translate API
Multi-proxy CORS fallback system | Custom CSS theming

Timeline

Built in less than a week as a side project at RYC.

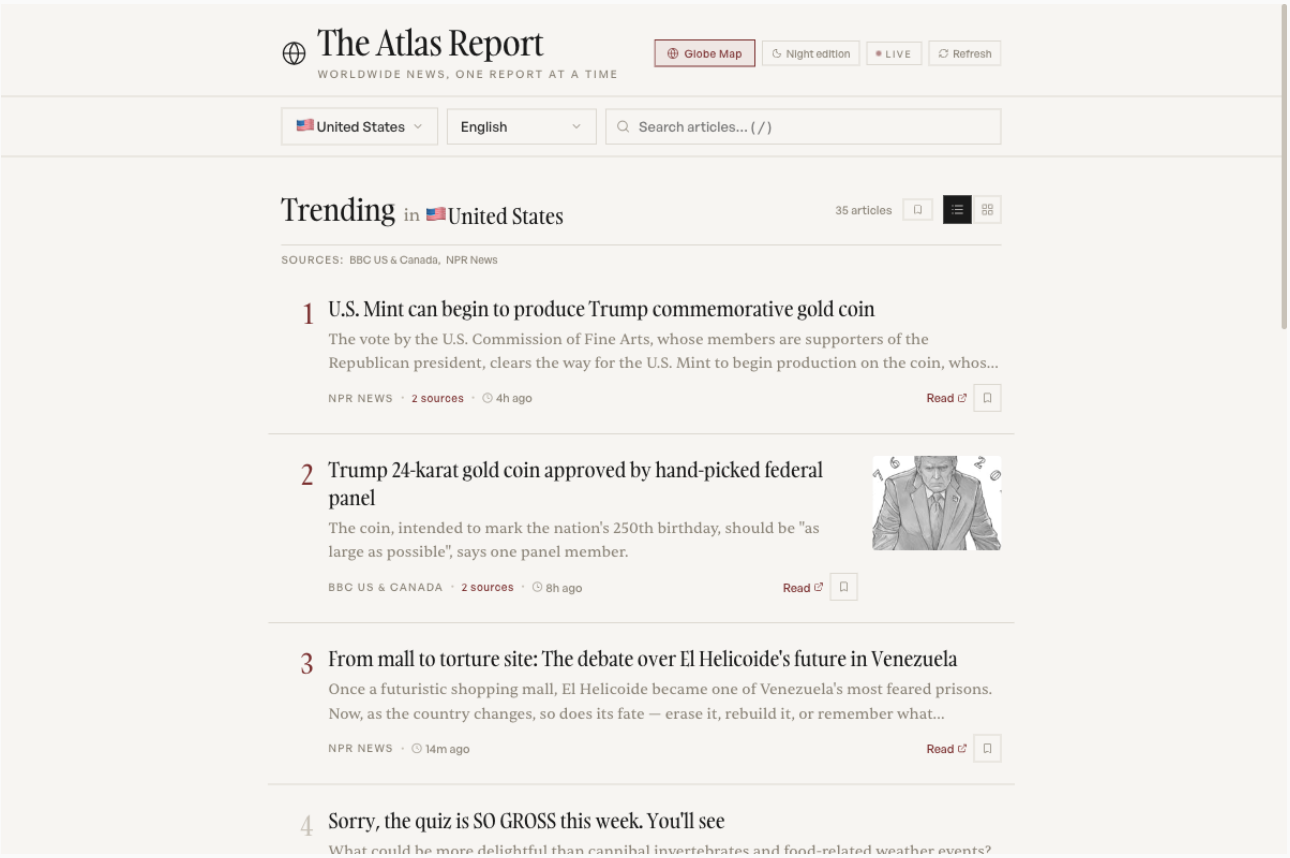
Homepage — News Feed

Newspaper-inspired design with ranked trending articles from Indonesia



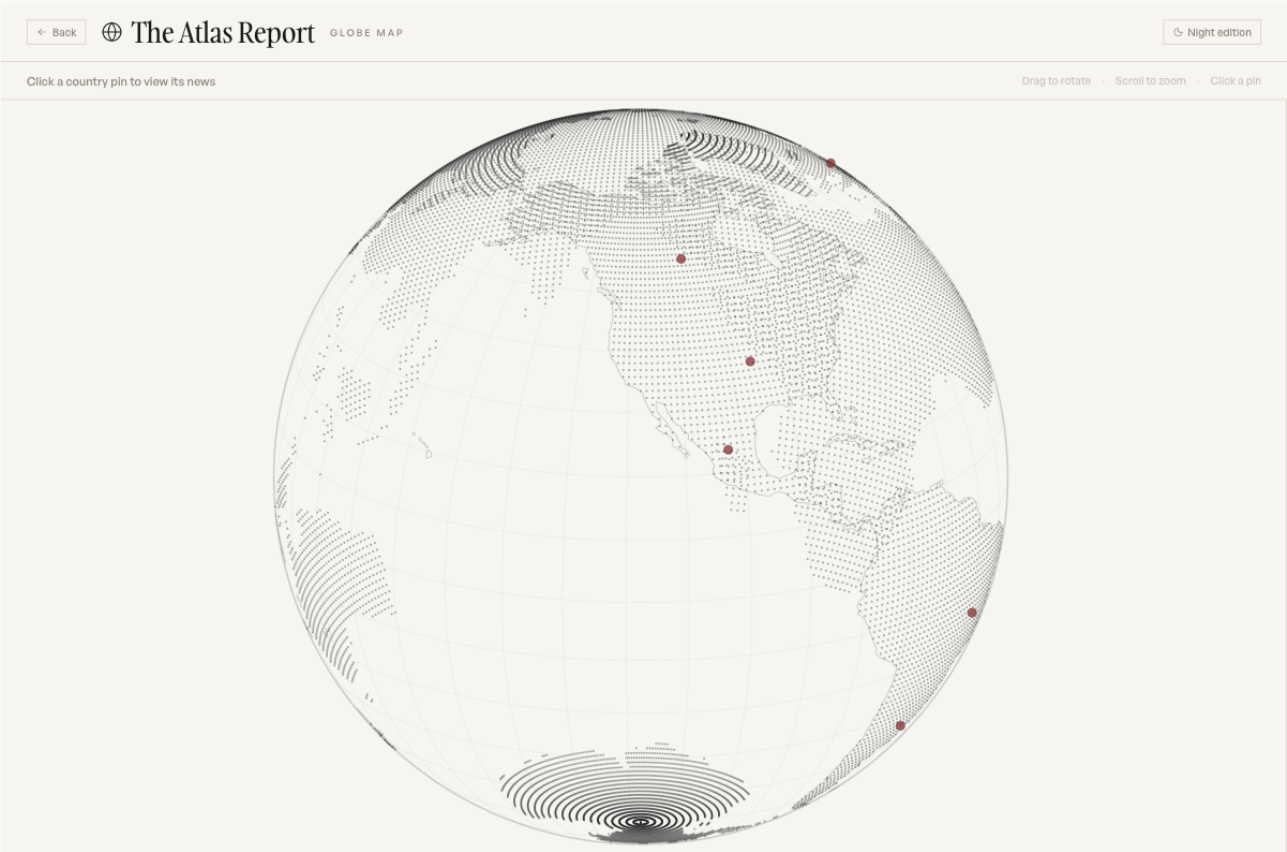
Country Selection — United States

Switch between 28+ countries to see local trending news from trusted sources



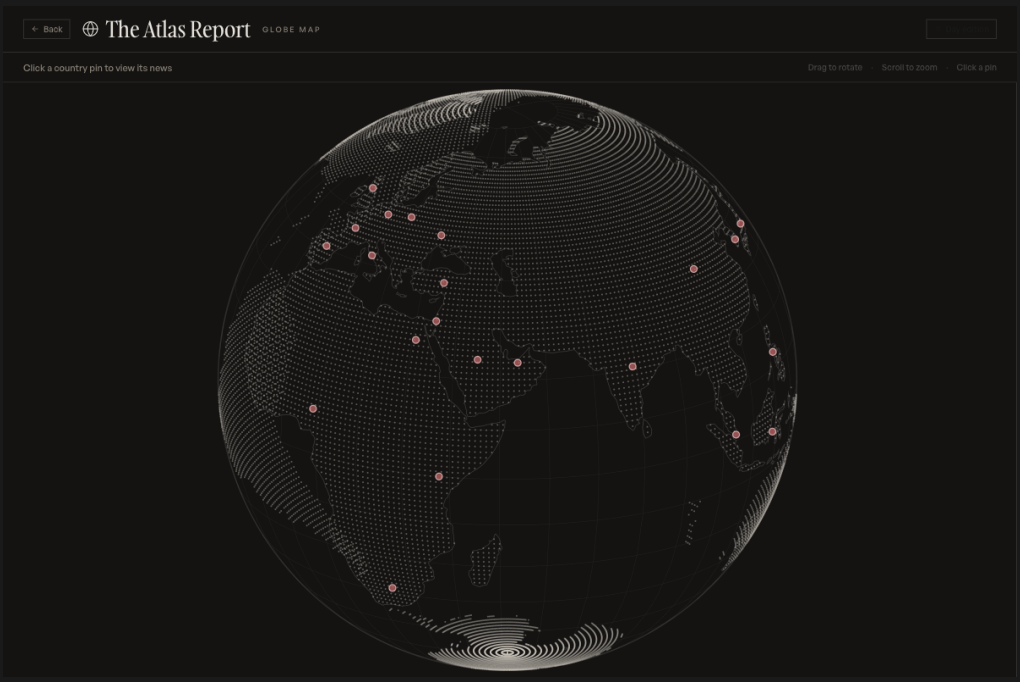
Interactive Globe — Light Mode

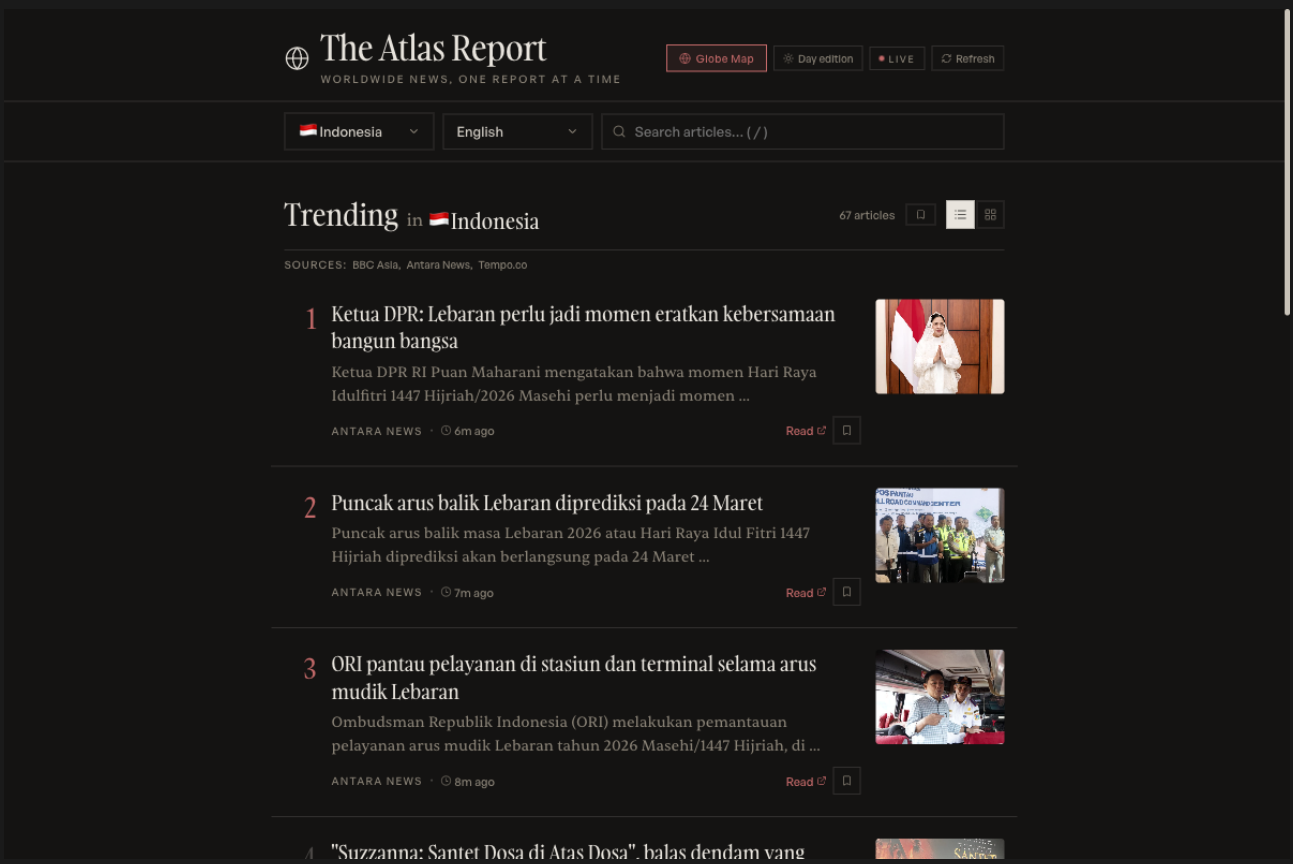
D3.js-powered 3D globe with country pins — click any pin to view its news



Night Edition

Full dark mode support across globe and feed views





The Atlas Report

Free & open global news for everyone.
